**End Application:**

Engine assembly tf117 pw100; c17

**Special Features:**

The 11th - 17th stage blades of the high pressure compressor must be spread for measurement between adjacent blades during assembly of the blade slots to determine the blade gap; pwa80983 pliers is a spreading tool that consists of a special pair of pliers with a torque handle, the plier jaws expand against the blades, and the torque handle limits the amount of force to prevent damage to the blades

**Functional Description:**

These pliers are required to spread the blades for measurement between adjacent blades during assembly of the blades into the blade slots of the hpc drum and/or applicable disk

**Fsc Application Data:**

Pliers, spreading - hpc blade 11th to 17th stage

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
