End Application:

C-17 aircraft, aerial delivery system

Special Features:

Operation: bolt the retainer to the vra; install the vra into the holding fixture; insert driver through retainer and into 17p2g1044 screw; perform calibration procedure, using the driver to turn the screw; remove vra from holding fixture; remove retainer from vra

Functional Description:

To hold and turn the 17p2g1044 screw during calibration of the vra

General Description:

Tool kit is in two parts; retainer (adapter) - size is 1.3 in. By 1.3 in. By 0.4 in. Thick, square in shape, with threaded center hole for socket, socket wrench style driver; driver (socket, socket wrench) - size is 1 in. Dia. By 2 in. Length, threaded end is external involute spline per ANSI B92.1-1970, socket end is 1/4 - drive female per ANSI B107.4-1982

Fsc Application Data:

Calibration kit, variable restraint assemblies (vra)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
