**End Application:**

117 engine assembly, tf117 pw100

**Special Features:**

Drift, seating - hpt balance arbor bearing, front and lpt balance arborbearing, front

**Functional Description:**

Before the balance arbor can be used for dynamic balancing of the low pressure compressor or high pressure turbine assemblies, it must be balanced; a balance bearing must be installed and securely seated on the journal of the arbor; this drift is required to install the front bearing onto two different arbors

**Supplementary Features:**

Size; 5.5 inch diameter large end; length: 21.0 inch; pwa80898 drift is cylindrical in shape with a standard drifthandle welded at the closed end

**Fsc Application Data:**

Drift, seating

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T294-m
