End Application:

F100pw220

Component Quantity:

3

Product Name:

Set, compressor

Special Features:

Tconsists of two specially designed pliers and a gage plate; pliers are 13.0 and 11.0 in. Lg and have rectangular crimping ends with circular cut outs of different diameters; gage plate has circular cutouts to verify correctdia.

Functional Description:

Used to crimp the tube end gaskets on various tubes on the engine to ensure the gasket is held in place during installation of the tube

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23800
