Overall Length:

10.000 inches

Diameter:

2.000 inches

End Application:

Support equipment for f/a-18; servocylinder piston

Usage Design:

Used to install spring pin to critical depth in servocylinder piston on f/a-18 engine

Operation Method:

Nonimpact

Features Provided:

Grip handle

Criticality Code Justification:

Agav

Special Features:

Forward end has drilled hole in tip to hold pin until it is installed; opposite end is knurled for easier handling

Material:

Plastic polyamide

Shape:

Cylindrical

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T294-m
