End Application:

Internal combustion engines

Usage Design:

Front timing gear cover/rear crankshaft seal housing centering tool

Product Name:

Installation crankshaft tool

Special Features:

Used to center the front/rear seal housing bore with the rear crankshaft flange during installation of the housing on powertech 10.5 and 12.5l engines. This tool also used to center front timing gear cover seal housing bore with the front crankshaft flange during installation of the timing cover

Material:

Stainless steel

Supplementary Features:

Shipping weight 2.6 pounds

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T294-m
