End Application:

F100/200 engine

Unit Type:

Self-contained

Pump Type:

Single

Special Features:

Consists of a circular steel plate with an 8 finger mechanism to pull on the inner race of the ball bearing via a hydraulic pressure applied through a hydraulic ram; required to pull the balance bearing from the 2nd stage compressor hub after the front compressor rotor and stator balance operation; measures 8.0 in. Long, 8.5 in. High

Style Designator:

Disk and plate

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
