Base Width:

10.000 inches

Base Length:

36.000 inches

Contact Point Type:

Regular

Special Features:

C/o steel rectangular tube w/feet extending at each end, sliding indicator assembly attached at center; gages low pressure turbine running position at rear flange of high pressure turbine case, while driveshaft has rearward load applied; used for maintenance on f117-pw-100 engine; 4 in. Ht; 31 lbs; periodic dial indicator calibration rprd; serd no. 0386

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T299-h
