End Application:

F100-pw-220/220e/ilc-hpt

Product Name:

Gage, standard

Special Features:

Constructed from a single crystal ni alloy ground to a 001 (alpha) crystal orientation and machined in steps of several thicknesses with parallel front and back walls; 3 inside diameters: 0.030, 0.039, 0.050 in; dim: 4.5l x 1.8w x 0.7thick in

Functional Description:

Used to calibrate equipment for depot ultrasonic thickness inspection of the 2nd stage turbine blade

Reference Data And Literature:

Serd 7845

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T299-g
