End Application:

F100-pw-220, 220e, 229

Product Name:

Gage, checking

Special Features:

Consists of a locator block to locate gaging surface of machining and weld fixtures

Functional Description:

Used to inspect the no 4 bearing compartment particle separator tube for proper length after cutting off damaged ferrule, or after welding on new ferrule

Reference Data And Literature:

Serd 7532

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T299-z
