**End Application:**

F100-pw-220, 220e, 229

**Product Name:**

Gage, checking

**Special Features:**

Consists of a locator block to locate gaging surface of machining and weld fixtures

**Functional Description:**

Used to inspect the no 4 bearing compartment particle separator tube for proper length after cutting off damaged ferrule, or after welding on new ferrule

**Reference Data And Literature:**

Serd 7532

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T299-z
