**End Application:**

F100-pw-229

**Product Name:**

Fixture, checking-combustion chamber assembly

**Special Features:**

Inspects p/n 4077670 and 4083194 combustor chambers; consists of dial indicator, ignitor locating pins, clocking and height gage blocks, steel base, swing arm, center post structure

**Functional Description:**

Used to inspect the radial relationship of the inner/outer combustion chamber assemblies, their step height, the clearance envelope of both spark igniters, and cowl height dimension

**Reference Data And Literature:**

Serd 8110

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T299-h
