Overall Height:

2.250 inches

Overall Width:

3.250 inches

Special Features:

Thickness of gage 0.034 in; edges are notched, each notch provides thickness measurement of 1.0 to 80.0 mils on one side and 25.0 to 2032.0 microns on the other side; accuracy of gage is plus or minus 0.2 mils; meets astm d 4414, standard practice for measurement of wet film thickness by notch gages

Functional Description:

Used to determine wet film thickness of organic coatings on smooth surface

Special Markings:

Directions for use; micron scale one side; military scale other side

Material:

Aluminum

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
