Special Features:

Mandrel set is required to polish front compressor air seals part number 4071080, 4071081, 4071082, 4083150 to restore scallop or hole surfaces for eddy current inspection. The various air seals will be installed in pwa71902 fixture on a bench. Scallops are polished using a standard Craytex type polishing wheel. Holes are polished using details of pwa71891 mandrel set. Polish wheels and mandrels are driven by standard hand tools.
