Overall Height:

11.500 inches

Overall Width:

25.500 inches

Product Name:

External supermicrometer model c-spl (computerized)

Functional Classification:

Atable supported type instrument that provides a reliable means of direct external measurment to 10 inches. Equipped with a micrometer headstock that incorporates a compensated measuring screw. The tailstock provides a highly repeatable measuring force. Headstock and tailstock are mounted on a precision ground cylindrical bed designed for high accuracy measurements

Special Features:

Accuracy - 20 microinches; resolution - 1 microinch; direct reading range - 1 inch; variable force - 2 to 40 oz; table lift range - 2.12 inches; electrical requirments 110/120v (2a) or 220/240 v (1a); 50/ 60 hz; talistock meter graduations - 10 microinches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
