End Application:

C-17 acft

Special Features:

Gage, concentricity; used to assure the rotor position relative to the stator, circular runout limit is .003 in. And concentricity limit is .006 in., relative to 3.1836 - 3.1845 in. Diam. Bore in the gearbox; consists of a commercially available non-magnetic dial indicator, a mounting base developed specifically for this appl., standard and modified commercially available mounting rods, and a clamp

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T303-b
