End Application:

117 engine

Special Features:

Required to measure sq inch area value of 1st stage turbine stator vaneassy when using computer enhanced method; gage is steel and carbide constructed w/inner trailing edge, outer leading edge buttress platform, locator pins, supports, convex and concave airfoilprobes, probe lever and computer terminal strip connector; 8.500in lth x 6.200in wide x 6.700in height; 25lbs; serd 1585

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T303-b
