End Application:

117 engine

Design Type:

Double end

Gage Type:

Combination go not go

Special Features:

Serd 0747; 1.0 in. Wd; 1.0 in. Ht; 1.0 lb; c/o narrow rectangular hardened steel block w/vertical legs of closely controlled height at both ends; legs differ in ht and marked "min" and "max" to correspond w/service limit acceptance dimensions; slides across base plate of fixture, which holds combustion chamber, legs act as a go-no go gage; checks outer liner lg of combustion chamber

Length:

3.500 inches

Supplementary Features:

Serd 0405

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T303-b
