End Application:

117 engine

Design Type:

Single end

Gage Type:

Combination go not go

Gaging Member Outside Diameter:

2.0000 inches

Special Features:

Rqrd to check axial location of combustor chamber igniter guide; gage isa steel rod c/o handle, flanged controlled diameter with go/no-go whistle notch and smaller diameter w/controlled inside dia; plug inserts into fixture bushing and service limit checked; serd 0135

Length:

9.000 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T303-b
