End Application:

F100-pw-220

Special Features:

Used to provide a reference flaw indication for calibrating eddy current probe and instrumentation prior to conducting eddy current inspection of the 6th-12th stage compressor air seal shielding holes; constructed from reference air seal segment mounted on bolotron; secured to an eci bench (pwa54233 or pwa38488); used when inspecting for fatigue cracks in the cooling holes at 4000 ccy depot induction interval

Supplementary Features:

Serd 7057

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T303-b
