End Application:

F100-pw-100/200/220/220e

Special Features:

Gage, front turbine case used to measure the turbine case after machining by contacting the inner case walls at a 25.108 to 25.104 in dia; consists of a dial indicator, a parallel type bar, positioning posts, and an adjustable locking detail having a sliding contact leg; 3.5 in diameter face; green tint, 0.0001 in grads, and 0.008 in range per revolution

Supplementary Features:

Serd 7822

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T303-b
