End Application:

F100-pw-100/200/220/220e

Special Features:

Master, gage, front turbine case used to set the gage prior to precision measuring of the inner diameter of the turbine case front flange; consists of a steel bar having support block doweled and bolted to the top surface of each end; each support block has a replaceable wear insert attached to the innermost face of each block; controlled dimension between the two inserts is 26.7000 porm 0.0002

Supplementary Features:

Serd 7824

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T303-b
