Special Features:

Inspection gage consists of a steel base with a root block at one end and a self mastering angled notch and shroud locator at the other end. A dog house dial indicator is located at the notch and shroud end of the gage on the guide and rest rails. Three pins mounted on the inner surface of the shroud locator are used for locating the blade master and blade shroud. The inner surface of the root block contains a tooling ball, ball plunger, locating pin and roll for mounting the blade notch and shroud. Used to measure pw220/220e 3rd stage turbine blade p/n 4084503 cross notch platform feature and step dimensions on the concave side of the blade. T.O. 2j-f100-13-9
