Overall Length:

6.300 inches

Overall Height:

1.200 inches

Overall Width:

3.150 inches

End Application:

Coating measurement equipment

Product Name:

Dualscope handheld mp20e-s

Special Features:

Bidirectional rs232 interface; lcd for measurement/evaluation data as well as icons for status display and operation notes; all magnetic induction, eddy current and dual probes can be connected; auto probe and material recognition; acoustic signals; lockable keyboard; us and metric units; 8 selectable display languages; auto shutoff; zero function

Supplementary Features:

Corrective and master calibration are stored in connected probe; displays , , mean value, number of measurements, standard deviation, date and time; measurement capabilities-nf metal coatings of zinc, chromium or copper as well as paint, enamel or plastic coatings on steel and iron; paint and plastic coatings on nf metals or stainless steel and anodized coatings on aluminum; plug type probes

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
