End Application:

Tf39-ge-1c

Special Features:

Gage set, pitch diameter; consists of a go and lo ring gage for the compressor shaft and a go and hi plug gage for the seal nut; gages are made from sae 01 tool steel, hardened to rc 58-62 w/a black oxide finish; used to inspect compressor rotor rear shaft and seal nut threads for pitch diam. And roundness, thus eliminating seal nut disengagement
