Hole Diameter:

Between 0.240 inches and 0.260 inches

Outside Diameter:

Between 0.576 inches and 0.601 inches

Internal Prebent Key Length:

Between 0.180 inches and 0.210 inches

Internal Prebent Key Width:

Between 0.070 inches and 0.100 inches

Distance From Centerline To Inside Of Prebent Key:

Between 0.120 inches and 0.130 inches

Material Thickness:

Between 0.0330 inches and 0.0355 inches

Special Features:

Tang location within 0.010 in either side of true position

Heat Treatment:

Stress relieved

Material:

Stainless steel

Material Specification:

Ams5510 assn standard single material response

Style Designator:

Key

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A022b0
