**Hole Diameter:**

Between 0.240 inches and 0.260 inches

**Outside Diameter:**

Between 0.576 inches and 0.601 inches

**Internal Prebent Key Length:**

Between 0.180 inches and 0.210 inches

**Internal Prebent Key Width:**

Between 0.070 inches and 0.100 inches

**Distance From Centerline To Inside Of Prebent Key:**

Between 0.120 inches and 0.130 inches

**Material Thickness:**

Between 0.0330 inches and 0.0355 inches

**Special Features:**

Tang location within 0.010 in either side of true position

**Heat Treatment:**

Stress relieved

**Material:**

Stainless steel

**Material Specification:**

Ams5510 assn standard single material response

**Style Designator:**

Key

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A022b0
