Cross Sectional Shape:

Rectangular

Edge Shape:

Rectangular

Center Hole Shape:

Rectangular

Thickness:

Between 0.035 inches and 0.055 inches

Center Hole Length:

Between 0.490 inches and 0.510 inches

Center Hole Width:

Between 0.307 inches and 0.317 inches

Special Features:

Both bearing surfaces have the edges of their longest dimension and the hole side parallel to them rounded by an 0.031 radius

Material:

Steel comp 1095

Material Specification:

Ams 5121 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A022b0
