Locking Feature:

Prevailing torque all metal design

Washer Outside Diameter:

Between 1.610 inches and 1.625 inches

Nut Style:

Double hexagon

Special Features:

Vacuum arc re-melt mandatory; magnetic particile inspection required prior to plating and subsequent to baking

Material:

Steel comp h11

Material Specification:

Ams 6487 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A021a0
