Hole Diameter:

Between 0.220 inches and 0.225 inches

Outside Diameter:

0.375 inches

Overall Height:

0.069 inches

Material Thickness:

0.005 inches

Min. Tensile Strength (psi):

185000 pounds per square inch

Heat Treatment:

Hot rolled or cold drawn 1/2 hard condition

Material:

Beryllium

Material Specification:

Qq-c-533 half hard federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A022b0
