Hole Diameter:

0.125 inches

Outside Diameter:

Between 0.297 inches and 0.303 inches

Material Thickness:

Between 0.005 inches and 0.006 inches

Countersink Angle:

82.0 degrees

Special Features:

Inside diameter is 0.125 plus or minus 0.003 inch before bending

Material:

Copper alloy 170 or copper alloy

Material Specification:

Qq-c-533 federal specification 1st material response or astm b194 assn standard 2nd material response

Style Designator:

Countersink internal teeth

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A022b0
