Hole Diameter:

Between 0.388 inches and 0.393 inches

Outside Diameter:

0.625 inches

Overall Height:

0.120 inches

Material Thickness:

0.010 inches

Min. Tensile Strength (psi):

175000 pounds per square inch

Minimum Yield Strength:

150000 pounds per square inch

Material:

Beryllium and copper

Material Specification:

Qq-c-533 temper 1/4 hard federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A022b0
