Hole Diameter:

Between 1.980 inches and 2.000 inches

Internal Prebent Key Length:

Between 0.210 inches and 0.230 inches

Internal Prebent Key Width:

Between 0.190 inches and 0.210 inches

Distance From Centerline To Top Of Internal Key:

Between 0.895 inches and 0.915 inches

Internal Key Quantity:

2

Material Thickness:

Between 0.038 inches and 0.043 inches

Special Features:

One internal key round bottom surface; one internal key round top surface

Material:

Steel comp 321

Material Specification:

Ams 5510 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A022b0
