Hole Diameter:

Between 0.312 inches and 0.313 inches

Outside Diameter:

Between 0.873 inches and 0.874 inches

External Keyway Length:

Between 0.075 inches and 0.085 inches

External Keyway Width:

0.100 inches

Material Thickness:

Between 0.093 inches and 0.094 inches

Criticality Code Justification:

Zzzy

Special Features:

Opposite end of the keyway, on the outside diameter, a distance of 0.002 inches , from the center of the inside diameter, the outside edge is flat across

Material:

Steel comp 304

Material Specification:

Astm-a276 assn standard single material response

Reference Number Differentiating Characteristics:

Material will be in accordance with ships parts control center activity hx quality control, manufacturing and testing specifications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A022b0
