Hole Diameter:

0.177 inches

Radius:

Between 0.250 inches and 0.252 inches

Outside Diameter:

Between 0.5010 inches and 0.5015 inches

Material Thickness:

Between 0.080 inches and 0.090 inches

Special Features:

Chamfer outside right coner 45 deg

Material:

Steel comp 630

Material Specification:

Ams 5643, cond h1150 assn standard single material response

Surface Treatment:

Passivate

Surface Treatment Specification:

Qq-p-35, type 2 federal specification single treatment response

Style Designator:

Concave

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A022b0
