End Application:

C130 brake assembly

Surface Finish:

150.0 microinches

Product Name:

Pin, wear indicator

Special Features:

Pin has a square head, 3 shoulders and 1 undercut, 2nd shoulder is threaded per mil-s-8879, pins function is to indicate the current wear of the brake, pin, indicator, wear

Material:

Steel comp 303

Material Specification:

Ams 5640 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A212a0
