First End Style:

Square internally threaded

Second End Style:

Chamfered

Pinlength:

31.0 millimeters

Pindiameter:

14.00 millimeters

End Application:

Valve, gate 4; nimitz class cvn

Second End Taper Length:

1.0 millimeters

Second End Relationship With First End:

Not identical

Second End Taper Angle:

45.0 degrees

Special Features:

First end internal thread 9 ml dp x 1/4 in -20 unc-2b

Material:

Nickel alloy k-500

Material Specification:

Ams 4676 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A212a0
