First End Style:

Round

Second End Style:

Square

Inside Diameter:

1.000 inches

Pinlength:

1.502 inches

Pindiameter:

2.5000 inches

End Application:

C.O.R.D.; seawolf class ssn

Second End Relationship With First End:

Not identical

Shear Strength:

60000 double pounds per square inch

First End Outer Radius:

0.060 inches

Special Features:

Pin with slot cut & .25 through hole on opposite cut

Material:

Copper alloy 464

Material Specification:

Qq-b-637, aly 464, tem-half hard federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A212a0
