**First End Style:**

Square internally threaded

**Second End Style:**

Chamfered

**Pinlength:**

6.500 inches

**End Application:**

Ballistic door, cvn 78 class aircraft carrier

**Second End Taper Length:**

1.370 inches

**Second End Relationship With First End:**

Not identical

**Second End Taper Angle:**

7.0 degrees

**Product Name:**

Pin, shock

**Special Features:**

Shaft is rectangular at 1.248 in (nom) by 1.498 in (nom); two countersunk holes at 0.25 in (nom) deep with 0.25 in diameter (nom) unthreaded and located 2.840 in (min) and 2.860 in (max) from first end along length; first end threaded hole thread size is 0.500-13 unc-2b

**Material:**

Stainless steel

**Material Specification:**

Astm-a-564, typ-17-4, cond-h1100 assn standard single material response

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A212a0
