Cross Sectional Shape:

Rounded corners

Inside Diameter:

0.140 inches

Casehardening Indicator:

Not casehardened

Major Thickness:

0.010 inches

Ring Style:

External

Usage Design:

External

Strength Rating:

180.0 pounds per square inch tensile

Material:

Beryllium copper

Material:

Copper alloy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T252-g
