Cross Sectional Shape:

Round

Inside Diameter:

Between 1.400 inches and 1.410 inches

Casehardening Indicator:

Not casehardened

Outside Diameter:

Between 1.560 inches and 1.570 inches

End Style:

Vertex below center

Ring Style:

Straight gap

Material Diameter:

0.080 inches

Usage Design:

Internal

Strength Rating:

265000.0 pounds per square inch tensile

Material:

Steel, ams 5112

Material:

Steel comp 1090

Material Specification:

Ams 5112 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T252-g
