Cross Sectional Shape:

Beveled one outside corner

Inside Diameter:

0.253 inches

Casehardening Indicator:

Not casehardened

Outside Diameter:

0.322 inches

Minor Thickness:

0.041 inches

Major Thickness:

0.350 inches

End Style:

90 degree parallel

Usage Design:

External

Material:

Copper alloy, qq-c-530

Material:

Copper alloy 172 or copper alloy 173

Material Specification:

Qq-c-530 federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T252-g
