Cross Sectional Shape:

Round

Inside Diameter:

Between 0.655 inches and 0.695 inches

Casehardening Indicator:

Not casehardened

Outside Diameter:

0.790 inches

Ring Style:

Special flat

Material Diameter:

Between 0.085 inches and 0.105 inches

Usage Design:

Internal

Material Hardness Rating:

Between 40.0 rockwell c and 50.0 rockwell c

Material:

Steel, sae 1065 or steel, sae 1066 or steel, sae 1069 or steel, sae 1070 or steel, sae 1072 or steel, sae 1074 or steel, sae 1075

Material:

Steel comp 1065 or steel comp 1566 or steel comp 1069 or steel, sae 1070 or steel comp 1572 or steel comp 1074 or steel comp 1075

Material Specification:

Sae 1065 assn standard 1st material response and sae 1066 assn standard 2nd material response and sae 1069 assn standard 3rd material response and sae 1072 assn standard 5th material response and sae 1074 assn standard 6th material response and sae 1075 assn standard 7th material response

Surface Treatment:

Nickel

Surface Treatment:

Nickel plated

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T252-g
