Cross Sectional Shape:

Counterbored and beveled face

Inside Diameter:

1.236 inches

Outside Diameter:

Between 1.630 inches and 1.634 inches

Material Thickness:

0.218 inches

Ring Style:

Concentric

Outer Edge Thickness:

Between 0.126 inches and 0.128 inches

Special Features:

Id tapered 10 degrees toward right face, materiel obtained from w. S. Shamban company, fscm 97820

Material:

Plastic

Material Specification:

Turcon mfr ref single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A08400
