Cross Sectional Shape:

Plain rectangular, straight face

Outside Diameter:

2.995 inches

Ring Style:

Expanding concentric

Radial Wall Thickness:

0.1850 inches

Overall Width:

0.1250 inches

End Application:

Turbine steam generator

Material:

Steel comp 1018

Material Specification:

Qq-s-633 federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A08400
