Cross-sectional Height:

Between 0.438 inches and 0.500 inches

Center Hole Diameter:

Between 0.250 inches and 0.254 inches

Peripheral Diameter:

Between 0.476 inches and 0.482 inches

Special Features:

Ends chamfered 25 to 35 degrees angle

Material:

Plastic polytetrafluoroethylene

Reference Number Differentiating Characteristics:

As differentiated by pac matl and feat in accordance with ships parts control center activity hx quality control, manufacturing and testing specifications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A032a0
