**Cross Sectional Shape:**

Circular

**Fabrication Method:**

Braided

**Min. Tensile Strength (psi):**

100 kilograms per square centimeter

**Cross Section Outside Diameter:**

0.375 inches

**Material:**

Flax and hemp, hh-p-106, class 3

**Material:**

Flax and hemp and oil lubricating

**Material Specification:**

Hh-p-106, class 3 federal specification single material response

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A26800
