Cross Sectional Shape:

Square

Fabrication Method:

Braided

Min. Tensile Strength (psi):

Not rated

Tempurature Rating:

500.0 degrees fahrenheit

Length:

9.800 inches

Cross-sectional Height:

0.375 inches

Cross-sectional Width:

0.375 inches

Lubrication Material:

Oil and wax

Material:

Asbestos and plastic, tetrafluoroethylene

Material:

Asbestos and plastic tetrafluoroethylene

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
