Tempurature Rating:
560.0 degrees fahrenheit
Cross-sectional Thickness:
Between 0.172 inches and 0.178 inches
Criticality Code Justification:
Zzzy
Maximum Pressure Rating:
1100.0 pounds per square inch
Reference Number Differentiating Characteristics:
Material will be in accordance with ships parts control center activity hx quality control, manufacturing and testing specifications
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A032a0
