Cross Sectional Shape:

Cup

Cross-sectional Height:

Between 0.060 inches and 0.070 inches

Center Hole Diameter:

Between 1.100 inches and 1.107 inches

Peripheral Diameter:

Between 1.173 inches and 1.175 inches

Angle:

40.0 degrees

Special Features:

Outside periphery tapered 5 degrees from center 0.025 to 0.035 in. To large id large edge machined to 0.005 to 0.015 in. Radius

Material:

Copper alloy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
